

TEMPOTEST®
ITALIAN PERFORMANCE FABRICS

100 years

The Art of Fabric

Warranty

1. The warranty is valid for 10 years on Tempotest acrylic fabrics, 5 years on Tempotest STARLIGHT® FR and STARLIGHT Blue, and 3 years on Tempotest STARSSCREEN® starting from the date of purchase.
2. The warranty exclusively covers the abnormal loss of color and/or strength due to normal exposure to the action of sun, salinity, and general atmospheric agents.
3. The warranty covers Tempotest fabrics exclusively. Any additional costs of manufacturing and installation, which could be requested by the installer or by the retailer, are not covered by the warranty.
4. The warranty does not cover damage due to circumstances beyond one's control, e.g. fire, flood, bird excrements, or air pollution. Also, the warranty excludes damage caused by mechanical actions or fraudulent actions. In particular, the formation of micro-holes in the cover, due to the mechanical action of opening and closing of an awning, is excluded from the warranty. Subtle differences in appearance of color saturation may occur over time resulting from atmospheric agents and pollution. This does not compromise the chemical, physical, and technical features of Tempotest fabrics.
5. Tempotest fabrics are components of a finished product. The warranty must be claimed against the retailer or installer from whom the finished products are purchased.
6. The warranty is not valid in the case of improper use and/or improper installation.
7. The responsibility of Parà is expressly limited to this warranty. Parà reserves the right to inspect the fabric that is the object of the claim and ask for proof of purchase.

In the case of an acknowledged defect in the Tempotest acrylic fabric within the 10-year warranty period, Parà will supply fabric equivalent to 100% of the value of the defective fabric up through the 8th year from the purchase date. In the 9th year, Parà will supply this fabric with a 30% discount. In the 10th year, Parà will supply this fabric with a 15% discount.

In the case of an acknowledged defect in the Tempotest Starlight FR & Starlight Blue fabric within the 5-year warranty period, Parà will supply fabric equivalent to 100% of the value of the defective fabric up through the 3rd year from the purchase date. In the 4th year, Parà will supply this fabric with a 50% discount. In the 5th year, Parà will supply this fabric with a 30% discount.

In the case of an acknowledged defect in the Tempotest Starscreen fabric within the 3-year warranty period, Parà will supply fabric equivalent to 100% of the value of the defective fabric.

The Art of Fabric

The appreciation of art is universal. Beauty is found in nature, but art makes us human. A work of art is the ultimate expression of beauty and Parà is proud to present the work of art that is the 2023 Centenary Collection. Each new design is a piece of art unto itself evoking feelings from the observer and telling the story of the artist.

TECHNICAL FEATURES	
Composition	Available Widths
100% solution-dyed acrylic fiber	47" 60" 80"
Weight	Water Column
8.8 oz/yd ² Coated: > 9.7 oz/yd ²	> 15 in > 39.4 in

Tempotest® fabric meets all requirements of paragraph 15.2 of UNI EN 13561:2009. The data corresponds to the material at the moment this technical data sheet was printed. Parà reserves the right to make changes to improve the product technologically. The updated technical data is available at tempotestusa.com.

A Superior Standard of Research • In-depth research into colors & styles inspired truly exquisite fabrics. The sophisticated final effect is beautiful hues, bursting with vitality & enhanced by elaborate textures.

The Return to the Natural Beauty of Imperfection
A combination of textures which, thanks to a special process, enhance the design of these fabrics with details that are naturally uneven.

The Elegance of Texture - Redefined
Inspired by the natural textile after which it is named, the beauty lies within the asymmetrical yarns & the artisanal care used to produce.

The fabrics in our Silk Collection vary from front to back

The Art of Fabric

Art is a journey. During the pursuit of perfection, we discover the very things worth appreciating. With tones, textures and colors that ignite the senses, art hints at what true beauty can be and reminds us that the journey is just as important as the destination.

TECHNICAL FEATURES	
Composition	Width
100% solution-dyed acrylic fiber	47"

A Superior Standard of Research • In-depth research into colors & styles inspired truly exquisite fabrics. The sophisticated final effect is beautiful hues, bursting with vitality & enhanced by elaborate textures.

Art and science through observation and interpretation • Matter can be both something of significance and a substance made up of various types of particles that occupies space. These striking textures both command attention and enrich any environment.

STARLIGHT blue

The Tempotest® Starlight blue collection proves sustainability, but does not mean you need to compromise. Our recycled GRS certified PET yarn offers exceptional strength, performance, and maximum UV protection (UPF 50+). As always, our exclusive Teflon™ Extreme finish offers the industry's leading protection.

Tempotest[®] Starlight FR is woven using our innovative 100% solution-dyed PET fiber with inherent Flame Retardant properties. This high-tenacity fabric has excellent color fastness and is resistant to UV degradation. Finished with our Teflon™ Extreme treatment, Tempotest[®] Starlight FR is water and oil repellent, anti-mold, and stain resistant. Tempotest[®] Starlight FR is perfect for use in public areas that require flame retardant fabrics such as hotels, bars, restaurants, and various other public buildings. The fire resistant properties make it suitable for use in closed and insulated structures where stoves, heaters, and other sources of heating are used. Tempotest[®] Starlight FR is extremely dimensionally stable and is well suited for large structures. The fabric meets or exceeds the maximum UV protection value for fabrics (UPF 50+).

TECHNICAL FEATURES

Composition	100% solution-dyed PET FR outdoor
Width	60"
Weight	8.8 oz/yd ² (+/- 5%)
Water column	>14in
Fire resistance	Class 1 (UNI EN 9177) B1 (DIN 4102) NFPA 701-10 MVSS 302 CSFM TITLE 19-SECTION 1237 CPAI 84

STARLIGHT[®] FR
Flame Retardant

STARSCREEN®

Tempotest® Starscreen® is an innovative fabric, unique in its type, because of its technical qualities, specifically it is not PVC coated. It has a nice textile hand that, together with its dimensional stability, make it perfect in appearance and particularly suitable for the architectural design world. Thanks to its solution-dyed PET fiber, Tempotest® Starscreen® can be used both indoor and outdoor without losing its original color. This helps to preserve the beauty of the building design. The carefully calculated transparency removes solar glare without restricting light into the environment. Tempotest® Starscreen® is classified flame retardant in passing CSFM title 19 - Section 1237, NFPA 701-2010, MVSS 302. Starscreen® is formaldehyde free and is recyclable, in accordance with REACH regulation.

TECHNICAL FEATURES

Composition	100% solution-dyed PET FR outdoor
Width	128"
Thickness	0.02"
Weight	6.49 oz/yd ² (+/- 5%)
Fire resistance	Class 1 (UNI 9177), B1 (DIN 4102), M1, NFPA 701-2010 test 1 small scale, CSFM T19 spec.
Openess Factor	3.5%

HEAT SHIELD & ENHANCEMENT OF LIGHT

Placed outside or inside the glass, Tempotest® Starscreen® absorbs and rejects up to 97% of the heat caused by solar irradiation while preserving the passage of light. Its particular thread gives a pleasant diffusion of light.

Awning Braid

Tempotest® Awning Braid is 100% acrylic and is color coordinated with the Tempotest® line of awning and marine fabrics. It has a fine, soft hand and is available in a wide range of colors. Tempotest® Awning Braid is suitable for use with any awning and marine fabric.

This braid uses the very same solution-dyed acrylic fibers as our Tempotest® fabrics and therefore provides the same superior overall outdoor performance.

TECHNICAL FEATURES

Composition	100% solution-dyed acrylic
Width	7/8"
Roll Length	164 yards (150 m)

Tempotest Care Instructions

Suggested fabric care & maintenance

Air pollution, smog, and/or other kinds of particles may get deposited on Tempotest® fabrics. Oftentimes, dirt of this nature can be removed by simply brushing the surface of the fabric with a soft brush and then spraying it with clean warm water (not to exceed 100°F) and allowing it to air dry.

Periodically, the fabric should undergo a deeper cleaning. Avoid the use of detergents, use only mild soaps like Woolite® or Ivory® soap. Gently brush the surface of the fabric with a solution of clean warm water and non-detergent soap (2 ounces of mild soap in a gallon of water not hotter than 100°F) and allow to sit for 15 minutes. Then, rinse thoroughly to completely remove the soap and allow the fabric to fully dry in the open-air.

Some environments may lead to tougher stains. Tree resin or sap may be transferred to the fabric. Treat with solvent to soften and remove as much of the tree sap as possible. Repeat as necessary. Then clean with soap and water and rinse thoroughly to remove solvent. Mold can grow in areas where water pockets are present. In these situations, it is recommended to follow the procedure above and add bleach to the solution, diluted at a ratio of 1:16 per gallon of clean warm water (no hotter than 100 F).

Do not iron Tempotest® fabrics with steam and do not dry using electrical devices. During the winter season, it is advisable to store the fabric in a dry and well-ventilated environment.

Fabric Pattern Selection Factors

Solar Heat Protection

Indicates the % of solar heat & infrared rays that a fabric will reflect and absorb. All the fabrics in the Tempotest Collection offer at least 74% solar heat protection.

Darker patterns typically offer better heat protection. If maximizing the decrease in temperature under the awning is a priority, pick relatively dark tones. Dark colored fabrics absorb more heat than light colored fabrics, so if the specific application does not allow for proper headroom, a lighter fabric will actually 'feel' cooler as you get closer to the fabric.

Solar Light Protection

Indicates the % of solar light a fabric will reflect and absorb.

Darker patterns typically minimize sun glare the most while lighter fabrics will keep the area under the awning brighter.

Protection from U.V. rays

Indicates the UV Protection Factor (UPF) which measures how much UV rays pass through the fabric.

Darker patterns typically provide more protection against UV rays.

UPF Range	Protection Category	% of UV Elimination
15-24	Good	93.3 – 95.9
25-39	Very Good	96.0 – 97.4
40-50+	Excellent	>97.5

Incident Energy

Ratio between the total solar energy transmitted into a room through a solar protection device/window system and the incident solar energy. A measurement of energy, usually heat, striking a surface. If you were sitting near a campfire, the warmth you would feel would come from the radiant heat of the fire, and it could be measured in terms of incident energy.

Awning Visualizer -- a simple way to see your awning

App for Desktop, Smartphones & Tablets

Tempotest® Visualizer's innovative technology takes the guesswork out of choosing your awning style and fabric pattern. We make it simple to visualize the perfect Tempotest® fabric for your home or business.

The industry's first awning visualizer app just got better! Our revolutionary Tempotest® Visualizer continues to make designing your perfect outdoor space a breeze with your phone and/or tablet through virtual reality and now our brand-new desktop version allows you to do so from the comfort of your living room. Better still, both versions are free to use!

The traditional app is available on both Apple and Android devices. Please visit the App Store or Google Play and search TEMPOTEST® VISUALIZER USA to download.

For the desktop version (PWA-Progressive Web Apps), please visit the below address for the download:
visualizer.tempotestusa.com

Both of these will give you the ability to visualize an awning on your building in five easy steps:

- CHOOSE** the background – pick from stock photos, a photo of your own home, or use virtual reality
- SELECT** the type of awning you want to see in your space
- FIND** the perfect Tempotest® fabric from our selection of over 250 designs
- PLACE** and adjust the awning for the perfect fit
- SAVE** the photo and share

Full tutorials highlighting all the features and tools for both versions are available on YouTube.
