[P]=Premium color

TEMPOTEST MARINE[®] COATED is used for manufacturing boat covers as well as sunshades, with omni-directional tension resistance. It is the ideal fabric for waterproof marine applications.

TEMPOTEST MARINE[®] COATED was tested for 2 years in Scandinavian winter sea conditions and demonstrated complete dimensional stability even where ice formation was present.

1 WATERPROOF

The transparent acrylic resin coat on one side waterproofs the fabric, passing the 1000 mm / 39" water column test.

2 DIMENSIONAL STABILITY

The special construction gives an extraordinary omni-directional, and especially longitudinal, dimensional stability.

UV RESISTANT

3 UV rays are filtered by the fabric which protects objects and materials, but above all people and their skin. All TEMPOTEST COATED[®] colors have a high UPF value.

HIGH COLOR FASTNESS

4 The solution dyed acrylic fiber allows these fabrics to keep their color unchanged over time, while subjected to the most invasive atmospheric agents, such as sun, wind, rain and salt.

Active biocidal substance:
Octylisothiazolinone.

TECHNICAL FEATURES

Composition

100% solution dyed
outdoor acrylic fiber

Width

60 inch

Weight

9.7 oz/sq. yard (+/- 5%)

Water column - UNI EN 20811

> 100 cm

Breaking Load UNI EN ISO 13934-1

Warp: 1700 Newton - Elongation: 32.5%

Weft: 1100 Newton - Elongation: 30.5%

Finishing

Soil-resistant, mold-resistant, oil and
water repellent with Teflon[™] finishing

Warranty

10-year warranty

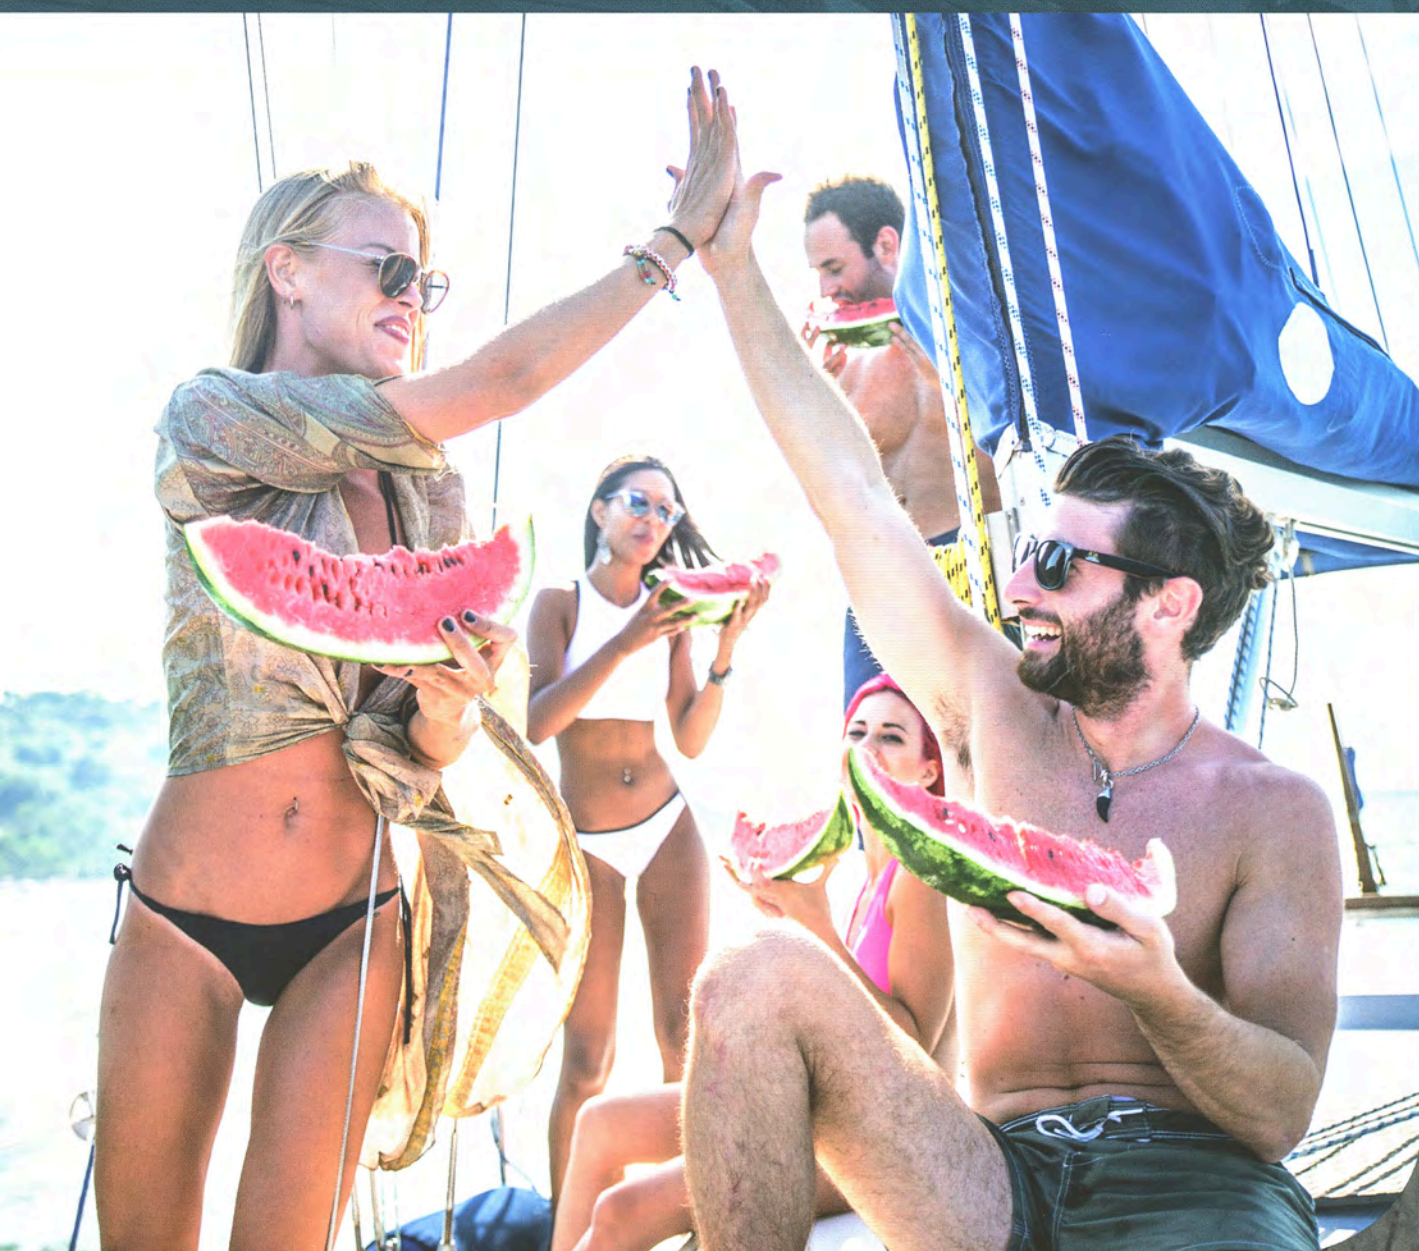

It is recommended to put the coated side inside

- HIGH COLOR FASTNESS
- WIDE RANGE OF COLORS
- BREATHABLE
- VERSATILE

- BOAT COVERS
- BIMINI TOPS
- SUN SHADES
- SPRAYHOODS
- ENCLOSURES
