

STARSCREEN

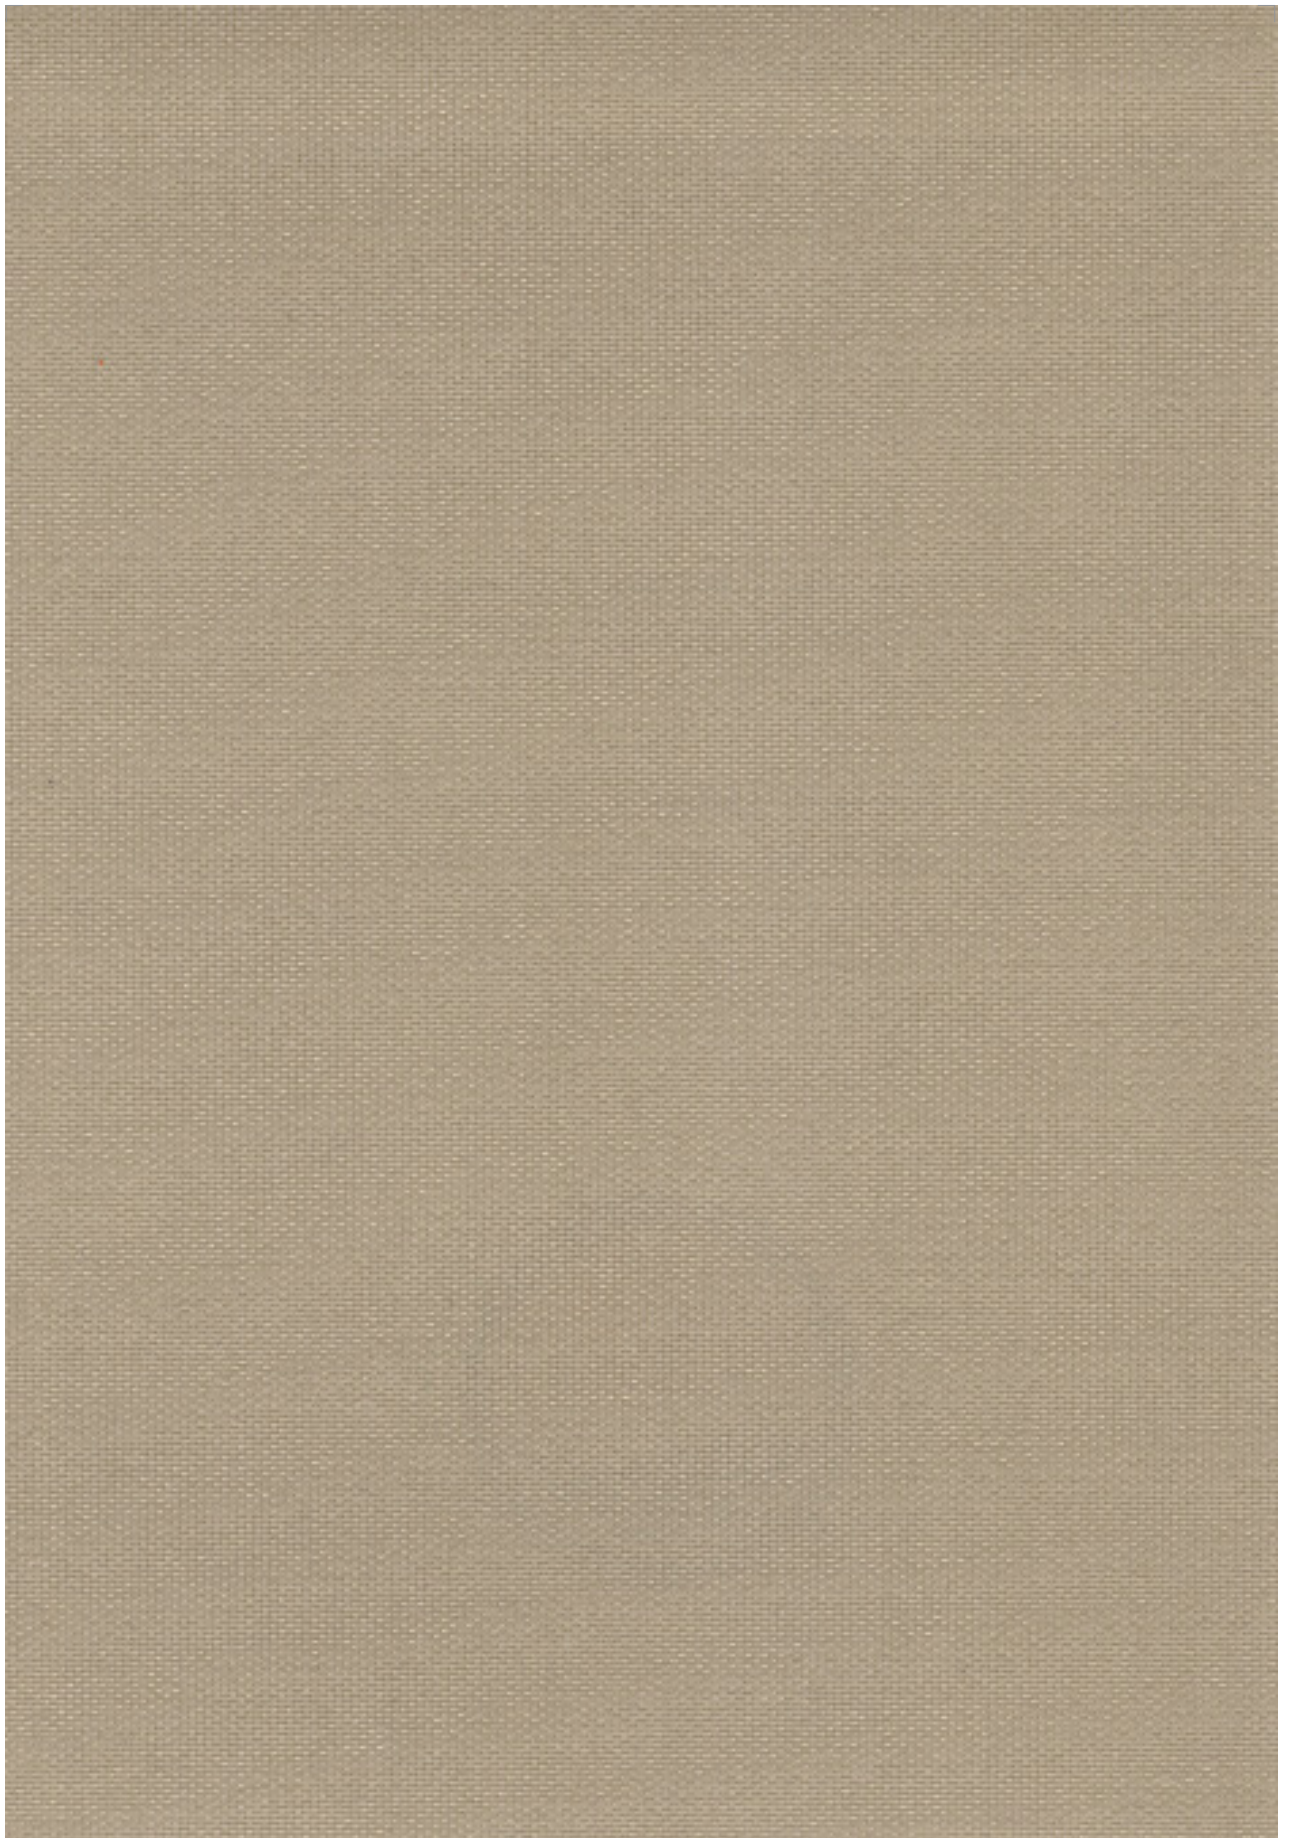

TEMPOTEST®
ITALIAN PERFORMANCE FABRICS

STARSCREEN

Tempotest® Starscreen is a unique and innovative shade fabric perfect for traditional drop shade systems, pergolas, and vertical shades. The carefully designed transparency removes solar glare without restricting light to the environment leading to a significant reduction in the need for air conditioning and artificial light. The transparency from within paired with an obscured view from the outside makes this fabric an ideal solution for environments where privacy is desired.
